CAPABILITY STATEMENT

PROVIDING QUALITY SERVICES TO THE AUSTRALIAN MINING AND MINERAL RESOURCE SECTORS

- ✓ Tailored water & sediment management solutions for all environments
- ✓ Flexible & expandable dredging designs provide a superior solution
- ✓ Protects plastic-lined process ponds, pits, tailings dams and tanks

COMPANY OVERVIEW

With over 25 years of experience in the Mining & Mineral Resource sectors, UAT Mining has been at the forefront of water management solutions.

We understand the challenges faced by companies in the Australian Mining & Mineral Resource sectors. That's why our unique pumping systems are designed to meet these demands while ensuring compliance and production efficiency.

Our in house team of highly skilled professionals provides a single-source of accountability, streamlined deliveries and communications for all projects.

Our unwavering commitment to safety, quality, and reliability sets us apart from competitors.

Prioritising these core values in our workforce, we invest time, training and research to enhance operational efficiency while maintaining a focus on quality and reliability.

COMMITTED TO EXCELLENCE

AUSTRALIAN MADE

CUSTOMER DEDICATION

OUR SOLUTION

Our innovative, efficient, and cost effective approaches are designed to help you meet environmental compliance without compromising on production or safety.

UAT Mining’s strength lies in supplying a number of approaches to sometimes difficult tasks covering both urban & remote locations. We have completed demanding contracts and specialized projects, learning to manage complexity, mitigate risks and simplify project execution.

We are constantly refining our practices through close collaboration with clients. This continuous development helps our clients achieve their goals while maintaining maximum production capacity.

UAT Mining is always approachable to discuss various options and/or combinations of proposals which best suit our clients’ requirements. We can tailor an innovative and competitive solution to match your needs.

Our proven performance builds trust and long-term relationships, ensuring consistent value and success for our clients.

TO LAST**

DREDGING SERVICES

WATER & SEDIMENT MANAGEMENT

Innovative solutions for all lined process ponds, pits and tailings dams. Site assessments, technical advice and long-term management strategies to ensure efficient water and sediment management and reduce operational costs.

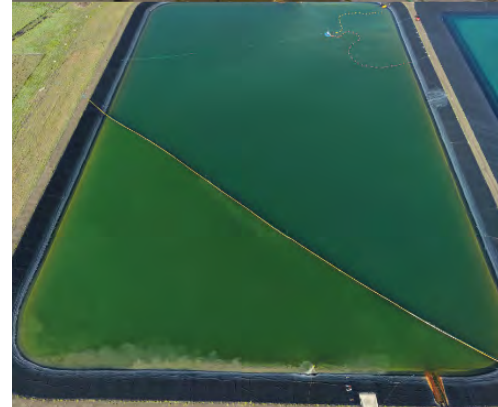

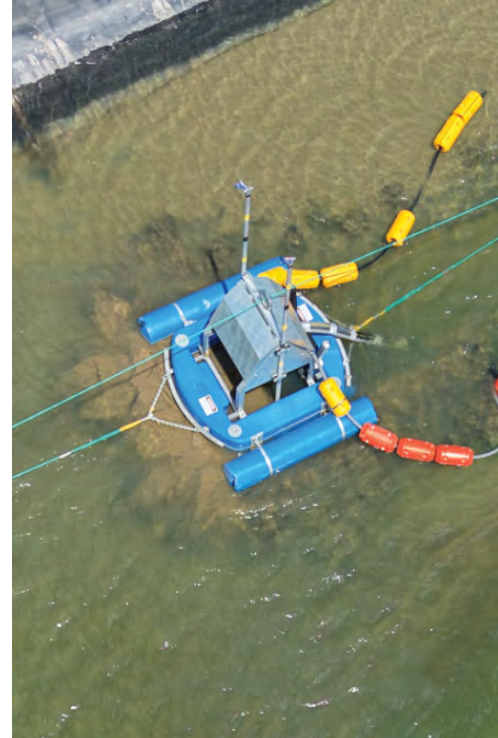

INNOVATIVE PRODUCT RANGE

Our range of highly scalable and diverse dredges and pump flotation systems and pipelines are suited to a wide range of applications and environments. Designed to prioritise safety and minimal operational and environmental impact.

CUSTOMISED TURNKEY SOLUTIONS

We design, build, and install unique pumping stations using in-house patented pump pontoons. Modular and custom designed equipment options for the removal of sediments and sludge from a wide range of pond and dam assets.

✓ SUITABLE FOR ALL LINED ASSETS

✓ SITE ASSESSMENTS

✓ HAZARDOUS MATERIALS

✓ CONFINED SPACES

✓ SAFE & LOW RISK OPERATIONS

✓ COST EFFECTIVE & EFFICIENT

✓ MODULAR & SCALABLE

✓ CUSTOMISABLE SOLUTIONS

✓ BANK CONTROLLED

✓ EASY MOBILISATION & HANDLING

CUSTOMER COMMITMENT

Quality is a key focus for the company and there is a proactive approach at all levels to manage and improve quality.

UAT Mining employs a **risk assessment** policy and business risk management plan to manage risks in all of the business' activities.

Our thorough approach to R&D, design of products to exceed the expected performance stresses and risks, and the company's solid growth provide the stability needed to support contracts in the major projects sector.

Our **safety management** system aligns with ISO AS/NZS 4801:2001 and meets major project clients' workplace health and safety requirements.

Risk assessment planning, education and awareness are critical elements of our service to clients.

Our aim is ensure environmental integrity through good business planning and to improve our clients' understanding of risk mitigation measures and solutions.

Our personnel are well versed in all aspects of risk management, including Methodologies. Pre-start Checklists, JSAs, SOP / SWP's & Risk Assessments.

SOME OF OUR CLIENTS

The **environmental impact** of contract operations and the wastes we collect on the environment has always been at the forefront of our design and engineering initiatives.

Our **environmental management** system aligns with ISO AS/NZS 14001:2004.

UAT Mining has procedures for assessing and approving the quality systems of our subcontractors to ensure high quality outcomes for our clients. Our quality management policy aligns with ISO AS/NZS 9001:2008.

Reducing resource use, minimising our impact on the environment and infrastructure, lowering noise and air pollution and ensuring resource reuse and recycling have been embedded in UAT Mining's corporate culture.

UAT Mining has an ongoing commitment to industry standard safe practices, providing the utmost quality and highest level of service.

We will always strive to excel in efficient project delivery using the best equipment supported by well trained, competent, motivated and dedicated personnel.

Our aim is to always satisfy our customers' current and future requirements by providing the very best outcomes and solutions possible. Contact us for your next project.

Let's work together on your next water management challenge.
